Q1:-

First introduced in Excel 2007, the ribbon is **the strip of buttons and icons located above the work area**. The ribbon replaces the menus and toolbars found in earlier versions of Excel.

Q2:-

When evaluating a formula, Excel follows a standard math protocol called "order of operations". In general, Excel's order of operation follows the

acronym **PEMDAS** (**Parentheses, Exponents, Multiplication, Division, Addition, Subtraction**) but with some customization to handle the formula syntax in a spreadsheet.

Q3:-
In Excel, the Name Box refers to an input box directly to the left of the formula bar. The Name Box normally displays the address of the "active cell" on the worksheet. You can also

use the name **box to quickly create a named range**. ... A named range is one or more cells that have been given a name.
